

# The New Mandate

## A mandate to end the Palestinian - Jew conflict

New borders for a viable two State solution. A State for the Palestinians to recover some of their land, a State for Jews (paid for by Palestinians).

### Narrative -

Everyone knows it is not possible for a Unified Palestinian State to exist when its stolen lands are fractured, surrounded by walls, and controlled by the State called Israel. To believe otherwise has proven to be futile and will continue oppression from Jews against the Palestinians. In order for a unified Palestinian State to have any chance of survival against the rogue Jewish State, new borders must be independently drawn and developed that will form two separate new States. For this reason, the Nations of the Globe must by any and "all means necessary" force the Palestinians and the Jews to accept a neutrally independently drawn re-alignment of the borders of the State called Israel into two new States. To achieve this goal all lands acquired by the State called Israel (since Statehood) including any subsequent changes thereto, structures constructed thereon, improvements or infrastructure made, as well as remaining Palestinian lands parcels, shall be available and included in the border realignment plan. Once new borders have been established, all land parcels lying outside of the newly drawn borders shall be exchanged with land parcels lying within the new borders. Land exchanges shall be made that eliminate all fractured non-contiguous parcels of land within the new two State borders. This is the only possible way a two State Solution for Palestine can occur. All concrete border barriers shall be removed, and the apartheid frame of mind must be eliminated. Jews and Palestinians must learn to live in harmony within their newly designated and independently drawn borders. The two new States that are drawn by this forced re-alignment method must become civil neighboring States worthy of acceptance by the Global community of nations and begin to act as such. The individual citizens of each State must have the same rights as each other and be treated as equals by all the countries of the Globe.

### The Mandate Basics -

The lands of "Palestine" shall be divided to closely conform to the borders shown on the side map. Only minor adjustments will be permitted. All manmade artificial boundaries or barriers shall be removed and replaced with a 10 ft. tall chain link fence to clearly define the new borders of the two States and the borders of existing neighboring States. All real property and/or improvements located within the new borders labeled "Israel" on the map shall become the property of the elected Government of the State called Israel and its citizens. All real property and/or improvements located within the borders labeled "Palestine" on the map shall become the property of the elected Government of Palestine and its citizens. In other words, Gaza and the South half of Palestine becomes the new State of Israel - Haifa and the North half becomes the new State of Palestine. All real property and/or improvements located outside of the borders labeled as Palestine or labeled as Israel shall become the property of the citizens of the joining and currently designated neighboring States - Lebanon, Syria, Jordan or Egypt.

- 1 The borders and limits of the City of Jerusalem shall be fixed by a special board appointed by the U.N. There shall be no private ownership of any real property within the boundaries established for the City of Jerusalem. All properties within the designated boundaries of the city shall be leased by a lottery, but managed and maintained by the neutral international board.
- 2 During the relocation of the various people groups within their new State borders the destruction of real property, any improvements, any existing infrastructure, and/or any existing structures will not be permitted (except for old fencing or artificial manmade border barriers). There will be no compensation to any person, current owner, occupant or Government for displacement or losses as a result of the relocation. Such losses will be the sacrifice by the people to obtain a lasting peace between the two new States.
- 3 All properties lying outside of each new State border will be vacated by the current occupant(s); all current owner documents will be destroyed. A time-table established by the U.N. will be set to evacuate any affected properties.
- 4 A system will be developed to distribute, and to grant new ownership documents to all lawfully acquired newly designated real property lying within the newly drawn State borders. Family house-holds and united groups of citizens will have the opportunity to acquire the new property lying within each new State by way of a National lottery to be held for that purpose.
- 5 If the State called Israel expects to be known as "Israel" the State must adopt the basic Biblical Hebrew law known as the 10 Commandments. Deut. 5:2-22.
